WELLNESS

CalComplex

From young adults to senior citizens, calcium is an essential nutrient that we need for good health at every age.* As the most abundant mineral in the body, calcium is a major player that works to support the body in many key ways - from promoting healthy bones to powering muscle contractions to regulating nerve function.* When we don't get enough calcium in our diet, it can limit our ability to stay active and lead to bone health challenges over time.*

With a full complement of calcium and other bone-supporting vitamins and minerals, NHT Global's CalComplex supplies your body with the nutrition you need to maintain strong and healthy bones.* Each daily serving delivers 600 mg of high-quality calcium to fortify the bones and teeth - along with phosphorous and vitamin K for added bone support and protection.* The proprietary formula also features well-established nutrients like vitamin D and magnesium that play a key role in the absorption of calcium, making sure it gets delivered and utilized in the body. With so many benefits in every tablet, CalComplex is an ideal choice to safeguard your bone health so that you can stay strong, healthy, and vibrant at any age.*
